

Dethroning the King from His Kingdom (A Christian Perspective on the Struggle of Addiction)

Date Monday, October 20, 2014
Time 9:00 am – 4:30 pm
Registration 8:30 am
Location Center for Learning and Development,
Building K

Target Audience

Case managers, social workers, psychologists, psychiatrists, licensed professional counselors, educators, school personnel, mental health professionals, clinicians, nurses, health and human service practitioners, and other health care professionals

Description

This seminar will provide introductory knowledge of drug addiction from a Christian perspective of creation, fall, and redemption. We will connect the spiritual understanding of Biblical idolatry to the symptoms of addiction. We will explore principles of working with addicted families including relational roles, boundaries, communication and strategies of prevention. Lastly, we will explore our own personal stories if we have been affected by the addicted family. My hope is that participants will journey through and know the redeeming power of the gospel story in their personal stories.

Objectives

- Understand a Biblical view of addiction from Creation, fall and redemption
- Understand the emotion and spiritual stages of addiction
- Examine addiction on the family unit including relational roles, communication and boundaries.
- Honestly examine student's own story and the way the gospel relates to him or her if they have struggle with addiction in their own family story or others that they have known.

Instructor Steve Benson, MA, MDIV, LPC, LCAS-A

Functional Behavioral Assessment & Interpreting the Results of the Functional Behavioral Assessment

Dates Thursday, October 23, 2014 &
Friday, October 24, 2014
(Must attend both days to receive credit)
Time 9:00 am – 4:30 pm (each day)
Registration 8:30 am
Location Center for Learning and Development,
Building K

Target Audience

This program is appropriate for mental health professionals who are already familiar with the basics of diagnosis. This includes social workers, psychologists, counselors, marriage and family therapists, substance abuse professionals, and all interested others.

Description

Functional behavior assessment (FBA) is defined as a range of behavior assessment procedures that are used to identify or clarify functional relationships between behavior and environmental events. In other words, a FBA is used to identify the "purpose" or "cause" of a specific target behavior. Once the function of the behavior has been identified, then interventions that are directly related to the occurrence of the behavior (i.e., function-based treatments) can be designed and implemented in order to reduce or eliminate the occurrence of the problem behavior. This workshop will expose attendees to FBA methodology including: data collection, data evaluation, interpretation of result and development of function-based interventions.

Objectives

- Participants will have an increased awareness in conducting, evaluating and interpreting a FBA
- Participants will have an increased awareness in the application of FBA results to guide the development of a function-based intervention.
